

## ROS Video Banner

Banner size is 300x250.

Video Image/Window is 290x163(ish).

This makes the background border on the sides and top of the video window 5 pixels.

The space at the bottom of the window 300x168(ish).

We'll need a static image with a play button on it for the initial load. And another static image to load after the video plays.
